# Physical Education Faculty

# Sport Level 3

Sport Level 3 is a stepping stone for anyone who sees themselves involved in sport and exercise as a career.

The most common pathways that our Sport students have taken include the following studies;

- Sport Science
- Sport and Exercise Science
- Sports Development
- PE teaching
- Sports Nutrition
- Physiotherapy
- Strength and Conditioning

Through the Sport level 3 course we try to offer as broad a curriculum through teaching units that form a sound base of subject knowledge for the above courses. The 4 compulsory units cover Anatomy and Physiology, Current Issues in Sport and Sports Coaching. For the remaining units we as a staff have developed a comprehensive program of content to best prepare you for further studies and/or a career in sport.

The course is 100% coursework and is assessed through word processed documents, presentations, witness statements, video evidence and practical coaching.
